## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Austin (US 6,470,139) in view of Perlman (US 6,530,085).

Austin discloses an electrical apparatus [2, figure 2] comprising a printed circuit board having processing components and at least one scart connection for a connection of a video recorder and a PC. Austin discloses the basic instant claimed invention except to show an adaptor having scart connectors.

Perlman discloses a cable having scart connectors reads on applicant's adaptor.

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the apparatus of Austin to include the cable/adaptor as taught by Perlman in order to provide the electrical connection between the devices, as well known in the art of electrical connectors.
